# Alec Reimel, Senior Developer

**Location:** Doylestown, PA // **Phone:** 610-908-6127 // **Email:** alecreimel1@gmail.com
**Education:** Bachelor of Science, Information Technology & Management, Syracuse University, 2012-2016
**Specialties:** AI Dev, Full-Stack, Frontend, UI/UX, Marketing, Analytics, Prompt Engineering
**Roles**: Full-Stack Developer, AI Developer, Software Architect, Tech Lead, Subject Matter Expert (SME)

**Full Dev Bio**

- **Coding Languages:** HTML, CSS, Javascript, PHP, SQL, Typescript, Node, Python, C#, C++
- **Frameworks:** Node, React, Next.js, Astro, Tailwind, Shadcn, Vue, Angular
- **Primary Skills:** Full-Stack Web Dev, Frontend, Backend, UI/UX, Accessibility, Data Security, SaaS, Product Dev, DevOps, CI/CD, Database Admin
- **Tools:** Git, Netlify, Vercel, CI/CD pipelines, Figma, Adobe
- **Marketing Skills:** user tracking, behavior analytics, SEO, ADA compliance, Google Tag Manager (GTM), Google Analytics (GA4), HubSpot
- **AI Skills:** Claude Code, Cursor, Gemini, OpenAI, Ollama, self-hosted AI, custom AI training, voice/image/video generation, n8n, LangChain, CrewAI, Palantir Foundry
- **Niche Skills:** VR, Augmented Reality, interactive live event products, digital signage, e-learning (LMS), Internet-of-Things(IoT)
- **Non-Dev Skills:** graphic design, audio engineering, live audio, podcast production, video production, prototyping & fabrication, electrical engineering
- **Certifications:** Microsoft Certified Professional (MSCP)

- **Hobbies:** music, guitar, bass, synthesizer, reading, tv & movies
- **Fun Fact:** I used to have a side hustle making tiny biker vests for tiny dogs.

**Profile:**
I specialize in developing websites, products, and tools for digital marketing.

My typical work day includes building conversion-centric marketing websites, setting up tracking and analytics services, researching and building AI apps, advising on marketing campaigns, and publishing my own open-source tools.

I develop creative yet practical solutions to the problems companies face. I've built agentic AI assistants and advisors, touchscreen experiences for live tradeshow events, and even award-winning virtual reality ad campaigns.

My past clients have ranged from small startups, household brands, Fortune 500s, Pharma, state and local government, and international holding companies.

**Previous Clients:**
Bristol Myers Squibb, Merck, Johnson & Johnson, Brother Printers, Werther's Caramels, Rutgers University, Rutgers Cancer Institute, NJM Insurance, Diageo, Guinness, Captain Morgan, Smirnoff, Bulleit, Casamigos, Pinnacle Federal Credit Union, Arm & Hammer, Eggland's Best, Real ID NJ

**Latest Role: Senior Developer - The Grovery** (formerly Mota 9)
**Duration:** Oct. 2022 - Aug. 2025 // **Location:** Lambertville, NJ
**Sub-Roles:** Tech Lead, DevOps, Software Architect, AI Engineer, Marketing Analyst
**Client Types:** Pharma, Healthcare, Lifestyle, Retail

**Responsibilities:**
- **Tech Lead:** I was brought on to bring the agency up to speed for modern web development and marketing tools. I mentored team members in using tools like Git and React to build higher-quality products with more powerful features.
- **Web Development:** The core focus of my role was building websites for company brands and marketing campaigns, along with setting up and configuring tools for tracking user behavior and properly determining the marketing ROI.
- **Tracking & Analytics Lead:** I was put in charge of all Hubspot, Google Analytics, and Google Tag Manager projects. I brought my own custom toolkit of user tracking tools, built advanced features for new AI search engines, and significantly upgraded the agency's marketing capabilities.
- **AI Research & Development:** I led the effort to develop cutting-edge AI tools and apps, including AI chatbots, AI agents, content generation, image generation, voice generation, custom AI model training, and security-compliant local AI.

**Notable Projects:**
- **Company Knowledgebase:** SaaS app for training and everyday employee reference, with an agentic AI chatbot assistant capable of using ChatGPT, Google Gemini, Claude AI, and custom Ollama models that run on secure company servers.
- **Kiosk Experience:** Informational experience for live in-person events and tradeshows, for use on tablets and large-format touch displays. Touch-centric, animation heavy, and highly interactive.
- **Tracking & Analytics Program:** User behavior tracking code for getting detailed results on marketing campaign effectiveness and attribution.
- **Augmented Reality Video:** NJ Ad Award winning Pharma marketing campaign using the same phone-based VR technology as Pokémon GO to create a virtual "hologram" style video of a person giving a presentation.
- **Agentic AI Marketing Advisor:** A personalized AI advisor that uses multiple AI agents and MCP tools to research companies and offer advice on their marketing strategies.

# Alec Reimel, Senior Developer

**Location:** Doylestown, PA // **Phone:** 610-908-6127 // **Email:** alecreimel1@gmail.com
**Education:** Bachelor of Science, Information Technology & Management, Syracuse University, 2012-2016
**Specialties:** AI Dev, Full-Stack, Frontend, UI/UX, Marketing, Analytics, Prompt Engineering
**Roles**: Full-Stack Developer, AI Developer, Software Architect, Tech Lead, Subject Matter Expert (SME)

**Full Dev Bio**

**Page 2 - Previous Roles. Latest role is on page 1.**

**Role:** React Developer - Thorium Digital
**Duration:** Nov. 2020 - Oct. 2022 // **Location:** East Brunswick, NJ
**Sub-Roles:** Product Owner/Lead, Onboarding, Mentoring, UI/UX, Marketing Analyst
**Client Types:** Retail, Beverage

**Responsibilities:**
- **Lead-Gen Marketing Websites:** I built conversion-centric lead-gen sites, which I streamlined and optimized into a fine-tuned template that reduced the difficulty and required development time needed from about 2 months to only 1 or 2 weeks.
- **Tracking & Analytics Specialist:** Due to my experience with digital marketing tools like Google Tag Manager and Google Analytics, I was placed in charge of any tracking and analytics work, and I taught a number of my coworkers new skills around using these tools.
- **Onboarding, Training, & Mentoring:** Using the commonly built projects I upgraded into templates, I served as part of the onboarding team and a mentor to a number of junior devs. New hires were able to use my well-documented project templates to quickly learn the company's tech-stack and required procedures, and even empower them to tackle basic client work while still learning.

**Role:** Lead Frontend Developer - Oxford Communications
**Duration:** Jun. 2016 - Jul. 2020 // **Location:** Lambertville, NJ
**Sub-Roles:** Tech Lead, DevOps, SEO, User Tracking, Data Analyst
**Client Types:** Pharma, Healthcare, Lifestyle, Retail

**Responsibilities:**
- **Lead Frontend Developer:** While I was a full-stack developer by necessity, I carved out a role as a highly skilled frontend and UI/UX specialist. I have an eye for designs that are both aesthetically pleasing and highly functional, with a strong focus on responsive design.
- **Tracking & Analytics Specialist:** I was in charge of setting up the tracking and analytics tools used to measure the success of marketing campaigns. I developed my own custom toolkit based on the work I did in this role, which has continued to be a valuable asset throughout my career.
- **SEO & Accessibility Specialist:** I also specialized in technical SEO - architecting websites for marketing performance and implementing the data and tools needed for marketing teams to run campaigns. Along with being an Accessibility specialist - where I ensured that differently-abled users were supported and that the business maintained ADA-compliance for legal protection.

**Role:** Web Design & Recruiting Intern - Kane Partners
**Duration:** Sept. 2014 - Jun. 2016 // **Location:** Lansdale, PA
**Sub-Roles:** Social Media, Copywriter, Research Assistant, Subject Matter Expert
**Client Types:** Coding, Tech, Engineering

**Responsibilities:**
- **Web Design:** I rebuilt the main company website and set up a new in-house job postings platform that greatly increased the amount and quality of candidates for recruiters to choose from.
- **Tech Recruiting:** I analyzed and sorted through candidates to send to other recruiters, and I advised other recruiters on specific technical aspects of certain roles that they didn't have firsthand experience in.
